

GE Healthcare – Life Sciences

Kate Bramhall

HR Generalist – UK & Ireland
Livingstone House
Leeds, LS10 1LJ

11 May 2017

Dear Ms. Bramhall:

It is with great pleasure that I enclose my application for the Digital Technology Leadership Program, to commence in the summer of 2018.

Since joining GE Healthcare as an intern in June of 2016, I have found myself astounded at the opportunities made available to me within GE. Although I have learnt and developed an exceptional amount throughout the year, I wish to advance my abilities a step further, and I strongly believe the DTLP provides me with the opportunity to do so. As we transform ourselves into a digital industrial organisation at the forefront of our respective industries, I firmly believe I can be one of the few who will lead GE to future success.

My degree in Information Technology Management for Business has provided me with a strong background in leadership and an ability to understand how businesses solve issues in varying domains. The information practitioner module offered me the opportunity to provide a resolution to a data management issue for our student's union, successfully challenging the universities data policy. My experiences have been extremely beneficial to my time at GE due to the sharing of industry standards and best-practice, and I will be graduating in May of 2018, with a predicted 1st Class Honors.

Within my workplace experience, I have a proven track record of achievements in both project management and solving technical challenges. Most notably, after conducting analysis of GE Healthcare's order management processes within our Life Sciences business, I successfully identified a potential reduction in costs by \$1.85M by 2018. This initiative – labelled the "Customer Order Journey" review – had me producing a complex value stream map of our current processes, accompanied by supporting data to identify the areas in which senior management should focus to maximise our impact. These efforts resulted in me being recognised by our CEO – Kieran Murphy – as a potential "future leader" of GE due to my ability to build key strategy and provide innovative solutions.

Outside of the office, I hold a keen interest in emerging technologies such as blockchain and digital twin, and I can be regularly found reading various articles and books to ensure I am aware of business and technology trends and issues.

I am extremely excited to learn more about this opportunity, and share more with you on how I believe I will be an excellent fit for the DTLP program. Thank you for taking the time to consider my application, and I look forward to hearing from you soon.

Yours sincerely,

James Comer - Prospective DTLP
